Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1886 Excerpt: . Chestnut is hardy upon heavy clay soil, but it has always winter killed upon our light sands. The two Catalpas, *C. speciosa* and *C. Ugnonioides*, are about equally hardy. Both suffer considerably, and appear to be unreliable. As *Catalpa speciosa* has not been recognised as distinct from the older species until quite recently, the leading distinctions between the two may be given: *C. speciosa*--tree tall, a straight grower; leaves softly downy, inodorous; flowers two inches across, nearly white, the lower lobe notched; pods stout and long (1 inch in circumference). *C. bignonioides*--tree lower, diffuse in growth; leaves smooth, or nearly so, giving a disagreeable odor when touched; flowers smaller, dingy, the lower lip entire; pods more slender, leas Japan Hybrid *Catalpa* is not hardy. The Cucumber tree, *Magnolia acuminate*, was injured nearly every winter until eight or nine years old. It endured the last winter better, although the highest shoots were killed. Others of the *Magnolias*, although not hardy, are desirable for the great annual shoots which have a tropical appearance. The Lomlardy Poplar is short lived in this climate. Yellow-wood, *Cladrastis tinctoria*, is always desirable; very beautiful when it comes into flowering. The Bald Cypress, *Taxodium distichum*, suffered last winter for the first time. The Ginkgo, *Ginkgo (Salisburia) adiantifolia*, is perfectly hardy. The following are among the new ornamental plants set last spring: *Ehododendron Catawbiense* and vars. Purple Beech. Cut-leaved Weeping Beech. Wheatley s English Elm. *Halesia Tertraptera*. Japanese Maple. *Paulownia Imperialis*. European Basswood....
