Not illustrated. 1911 Excerpt: .practical clinician regards the laboratory as the culture house for his ideas, and is even prone to inquire into the physics, chemistry, physiology, and pathology of the vital phenomena that engage him. It is pleasant also to observe that in this new era Americans are doing their full share in the development of science. Since, more than ever, to-day our chief advances have their forerunners in laboratory research, it seems wise that now and then we should put our ear to the ground, as the saying is, to anticipate the coming of new hosts of ideas. I have, therefore, ventured to present to you, imperfectly and in outline, a theme which during the last five or six years has gained a new significance, which is now modifying our conceptions in every field of physiology, which directs the bedside practice of every clinician, and which promises in...
