Original publisher: Aberdeen Proving Ground, MD : Army Research Laboratory, 2010 OCLC Number: (OCoLC)227945483 Subject: Programming languages (Electronic computers) Excerpt: . . . cation statements were developed with the goal that each communication statement should have a unique representation that reflects its semantics. Lastly, the control flow edges of the MPI-CFG are annotated with a value that reflects static information about the number, and possibly the process identifiers ( if available ) of the processes that could execute along that edge. The value will be one of the following four: ( 1 ) `c` , indicating the known process id `c` of the only process that will execute that edge, ( 2 ) `single` , indicating that statically one can prove that only a single process will execute this edge, but one cannot determine the process id, ( 3 ) `unknown` , indicating that it could be one or more processes executing. this edge, Or ( 4 ) `multiple` , indicating that definitely more than one process will execute this code if there is more than one executing process. A predicate annotation ( e. g. ....
