Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1766 Excerpt: .Question 351, answered by the Profio/er. It is evident that all the 7 Hands (and second Hand) will meet in the Product of the Time of each Revolution, (first multiplying i by 60 to make it the least whole Number) vix. in $1 \times 1 \times 3 \times 4 \times 5 \times 6 \times 8 \times 12$; but because some of these whole Numbers are Multiples to others, the 8 Hands will all meet in less Time; vix. in the Time of thehlcost Dividend, or least Number their Times of Revolution, will all divide. so find the least whole Number, or Dividend, that several whole Numbers will divide without a Remainder. Rule. Divide the Product of any two whole Numbers, by their greatest common Measure, and the Quotient will be the Answer, for those two Numbers. Then, the Product of that Quotient and a third Number, being divided by their greatest common Measure, the Quotient will be the Answer for...
