Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from A Text Book on Welding and Cutting Metals It is only a short time since the second edition was issued, and it is gratifying to find that the supply is nearly exhausted. There are many mechanics and autogenous welders who desire short, clear and practical instructions on the subject of acetylene welding and it is the purpose of this book to fill this demand. A comprehensive treatise on this subject would necessarily include much technical material that would be useless to the practical man who wishes to acquaint himself with only enough theory to thoroughly master the performance of his duties. and for this reason we have excluded nearly everything of a strictly technical nature. The Chapters on chemistry. physics and metals are of the most elementary nature, and cover in the plainest language only the subjects that are vital to the welders information. At the same time they are sufficiently explicit to give him a thorough working knowledge of the subjects that pertain to his work. In compiling these pages we have consulted the works on the Manufacture and Properties of Iron and Steel. By II. II. Campbell. The Metallurgy of Iron and Steel, by Bradley Stoughton, and Autogenous Welding, by Granzon and Rosemberg: and some of the text relating to generators and welding has been condensed from papers which we contributed to a few of the leading magazines. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present...
