Excerpt from A Manual of Elementary Practical Physics: For High Schools This book has been written in the hope that it will be found helpful in promoting a greater thoroughness in the study of elementary physics. It is an outgrowth of several years experience in teaching experimental physics to large classes in the East High School in Minneapolis. The greater part of the experiments have been performed each year by nearly a hundred pupils, and have been altered until experience has shown that the explanations and directions given were sufficient, and that good results could be obtained. The author, therefore, feels confident that the course described in the following pages will present no unconquerable difficulties to the average high school pupil in the junior year.
